ABSTRACT

Indian government has declared that 87% of currency is illegal on the eve of member, 8, 2016. It will necessitate the change in daily lives of everyone. A bedlam has established in every section of society whether rich or poor, disabled or abaledon the one hand, people responded positively while on the other hand people criticised it. Majority of Indian population is dependent on informal sectors of occupation which include agriculture, worker in construction, transaction are almost minimal. In present research paper we try to review the Polarity of opinions that are the majority of people in the favour, negative or neutral on demonetization through collecting data using social media tool -Twitter.

Keywords: Demonetization, Sentiment analysis, Machine learning
