

About the conference

The conference aims to bring together diverse perspectives on pressing global issues, focusing on sustainable development, technological innovation, and social equity. Key topics include Sustainable Urban Development and Climate Change, exploring how cities can adapt through green planning and architecture; AI and Ethics in Global Governance, examining the ethical and legal frameworks for AI technology; and Gender, Migration, and Economic Empowerment, analyzing economic policies for empowering migrant women. Other critical themes include Public Health in the Age of Pandemics, addressing multidisciplinary approaches to health crises; Water Security and International Cooperation, assessing the global water crisis; and Food Security, Agriculture, and Climate Resilience, integrating agriculture and environmental science. Additional discussions will cover Digital Equity in Education, Aging Population challenges, Human Rights amid Technological Surveillance, and the Circular Economy. Accepted papers will be published in reputed peer-reviewed journals, including Scopus and UGC Care-indexed ones, and indexed on platforms like Google Scholar. Authors will receive certificates for publication and presentation, with all conference papers included in an ISBN-registered proceedings book. Papers in absentia are also welcome.
