ABSTRACT

Now days a teacher should not only be an academician. They should have to motivate and inspire the students so that students have overall development spheres /area like extra curriculum and sports so they have developed their talents and skills. Teachers should ensure skills and productive knowledge in students. The role of a teacher in society is both significant and valuable. It has far-reaching influence on the society he lives in and no other personality can have an influence more profound than that of a teacher. In addition to these attributes, the role of a teacher is to acquire professionalism and ethics and abide by their own moral code and that of their school, while maintaining a commitment to confidentiality between students, colleagues and the community. The world changes day by day and there are no doubt that the modern society is not the same with an ancient one. Education system has changed completely – nowadays being teacher does not mean only being a helper in difficult process of getting education; it means being creative and highly talented “guide”, which accompanies a student in all way of studying. Are these changes positive or negative? In my opinion, contemporary teachers should pay more attention to new methods of teaching, what will make studying more enjoyable. Together with the changes, new expectations appeared towards our schools. Nowadays schools need to teach their learners how to gain information and how to select and use them. This happens so quickly that students learn how to use the Internet together with their teachers. Nowadays, teachers provide information and show their students how to tackle them. Although they are still considered to be a kind of leader in the class, they can be thought of as facilitators in the learning process. They are supporters rather than educators and also advisors towards parents.

I. INTRODUCTION

The young are facing a world in which communication and information revolution has led to change in all spheres scientific, technological, political, economical, social, cultural. To be able to prepare our young learner to the future purpose with confidence. Hence a teacher role is to be flexible in nowadays and have to play all around activities and roles.

Subject ÷ A teacher changing role in today's time.

Teacher should not be an academician only with this a motive enhance motivating and inspiring the students.

- # Teacher should make the students skilled and productive making the students overall development either in field of extra curriculum and sports area.
- # Teacher should enhancing on technology while delivering lectures i.e power points presentation ensuring proper and easy understanding of delivered lectures.
- # Teaching should be technology oriented enhancing more technology.
- # Teaching should be knowledge centric approach instead of certificate oriented approach.
- # Teaching should enhanced civilized nation citizen thorough there teaching.

II. CONCLUSION

In last we can conclude that a today teaching is widely changing a teacher is playing role of audience , motivate, inspiration, A overall personality. Hence a teacher is playing a important in society development and good nation building. A teacher has also a big role in management of institutions too. It may be concluded that education itself has value and value oriented. Right education is not only awakening the intellect but also awakening the consciousness of the self, the spirit. Self-knowledge and self-realisation apart from the knowledge of outer world only lead to complete education. Ancient Indian tradition for long time maintained this balance through its ashram paramparti and puru.shtirtha. However, the same fell down from its highest standard in later periods. Our contemporary philosophers tried to rejuvenate our traditions with their thoughts after seeing the defects of modern education implanted by Macaulay for trade and political interests of British government in India.
